

Introducing Niromed

Leading the Parallel Import Industry in Lithuania

Sales Channels Covered:

Retail:

Ensuring a wide range of pharmaceutical products are available to consumers.

Governmental Procurement:

Trusted partner for public health needs.

Unlicensed Medicine Supply:

Meeting niche and critical demands with efficiency to the public in need.

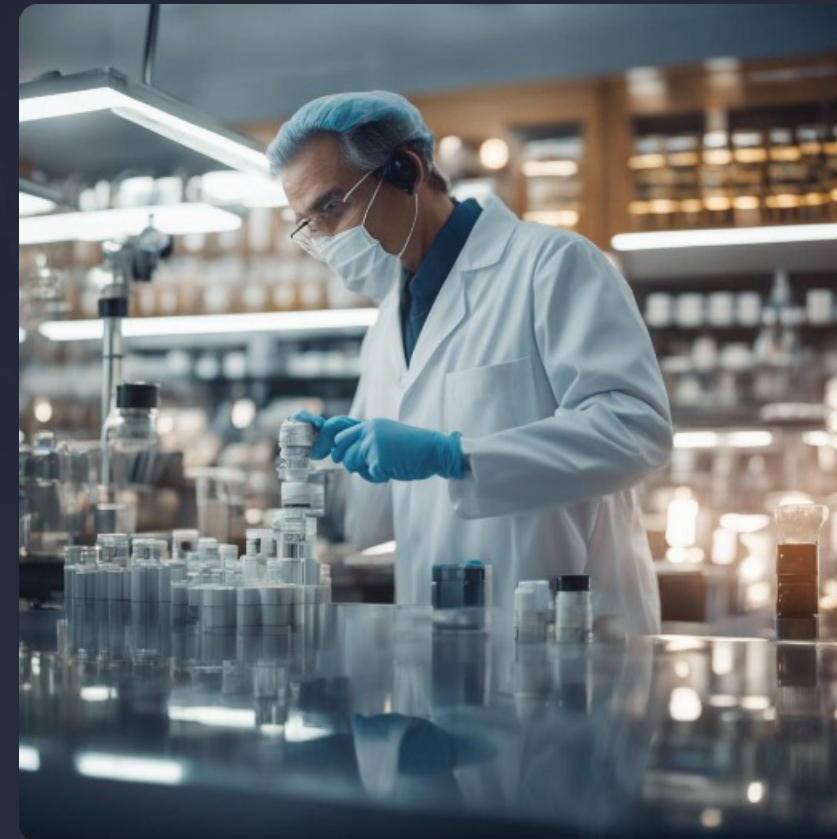

Parallel Import of Medicines to Lithuania. How can we procure?

In parallel distribution of medicines, there are two options for procurement:

Option 1: Country of Origin through Local Wholesale Companies

Buy medicines from the country of origin through local wholesale companies.

Option 2: Manufacturer in Local Language Packages

Buy medicines direct from the manufacturer in local language packages from the country of origin.

Lithuania's PI Procedure: A Technical Overview

1. MA in exporting country:

- MA with a generic application (10.1) or an original application (8.3) in place

2. Lithuanian MA Alignment:

- Match MA with an existing Lithuanian MA.
- Options include both generic (10.1) and original (8.3) applications.

3. Expedited Approval Process:

- Leverage the Fast Track approval mechanism for quicker market entry.

4. Exception for Injectables:

- For injectable forms, a direct match isn't mandatory.
- An MA from the country of export with WEU endorsement is deemed suitable.

Why Partnerwith Us?

1 Expand Your Sales Reach

Tap into your own sales channel and unlock new opportunities by offering your locally-made products to customers in Lithuania.

2 Accelerate Product Registration

With Niromed's fast track registration process, your products can swiftly gain approval and enter the market, ensuring a competitive edge.

3 Build a Trustworthy Partnership

Partnering with Niromed means forging a reliable alliance built on trust, dedication, and shared success, enabling you to thrive in the Baltics.

4 No Extra Costs

Since Niromed is taking care of everything from start of registration until final execution, you can enter the Baltic market without incurring any additional expenses.

Packages would be supply in origin carton and new labelling in Lithuanian language is not needed from manufacturer side. No need from manufacturer side to proceed and monitor with local PV activities as it would be covered by Niromed.

From start of Niromed till now..
